Machine Learning Intern

Worked on the project named **Predict whether person get a stroke or not using KNN algorithm**.
- Implemented a predictive model using the k-Nearest Neighbors (KNN) algorithm to determine the likelihood of a person experiencing a stroke.
- Utilized a dataset containing relevant medical and lifestyle factors, and applied KNN to classify individuals as either at risk or not at risk of stroke.
- Successfully trained the model, achieving accurate predictions based on input features.

ACHIEVEMENTS
